Medical Adhesive Remover Spray

Fast and painless removal of medical adhesive devices from the skin

FACT BOX

Medical Adhesive Remover Spray

Market segments: Professional healthcare and Consumer Healthcare

Composition: 100% siloxanes

Product approvals: Registered according to MDD (Medical Device Directive, 93/42/EEC. Sterile and non-sterile versions, Class IIa.)

Shelf life: 3 years from production date

Packaging: Standard can sizes are: 50, 100, 125, 150, 200 and 250 ml. Individual carton boxes, with or without leaflets are also available.

Presentations: Both sticker labels and preprinted cans can be used. Labels can be provided with a tamper seal. Preprinted cans are recommended for quantities of 25,000+ per order.

The silicone medical adhesive remover (SMAR) from Aurena Laboratories gently and painlessly removes adhesive products, such as stoma pouches and wound dressings.

The aerosol is free of preservatives, does not sting on application and preserves skin integrity.

It enables repeated removal of devices, even from delicate skin as in the case of epidermolysis bullosa (EB) and other skin diseases. It also reduces anticipatory pain, which translates to less nursing time and better quality of life.

Frequently removing medical adhesive devices from the skin creates untoward effects on the skin, as layer by layer of the stratum corneum (the superficial layer of the skin) is stripped off. The result is a reduced barrier function and inflammation of the skin. This is particularly a problem for stoma patients, among others, who change their device repeatedly during the day.

Description:
The product is intended for fast and painless removal of medical adhesives from the skin surface.
For all ages.

Claims:
- Removes devices with medical adhesives attached to skin
- Doesn't sting on application
- Preserves skin integrity when removing adhesive devices
- Preservative free
- Can be used in any position
- Sterilised and non sterilised versions
