

Burn Gel

Water based gel for first aid treatment of minor burns, scalds and sunburn

FACT BOX

Burn Gel

Market segments: Wound and skin care, First Aid, OTC

Composition: Hydrogel with Aloe Barbadensis

Product approvals: Registered according to MDD (Medical Device Directive, 93/42/EEC, Class IIa)

Shelf life: 3 years from production date

Packaging: Standard can sizes are: 50, 100, 125, 150, 200 and 250 ml. Individual carton boxes, with or without leaflets are also available.

Presentations: Both sticker labels and preprinted cans can be used. Labels can be provided with a tamper seal. Preprinted cans are recommended for quantities of 25,000+ per order.

The burn gel from Aurena Laboratories cools and soothes skin that has been damaged or burned by the heat, sun or radiation.

The gel is a water soluble, transparent hydrogel, also containing aloe concentrate. It is to be used as first aid treatment on the skin after excessive exposure to the sun or after heat exposure to achieve the cooling and soothing effects and thereby reducing pain. The product may be used to treat radiation induced dermatitis, which may be considered a superficial burn. The use is limited for first or superficial second degree burns only.

Bag-on-valve technology allows Aurena's burn gel to be applied from any angle or position with an emptying rate of close to 100%. Therefore, there is no need for hand-spreading, which allows for a more comfortable application on burned and damaged skin.

Description:

Water based gel for first aid treatment of minor burns, scalds, sunburn and radiation injured skin.
For all ages.

Claims:

- Cooling effect on burns
- Pain relief
- Transparent protective gel
- Non-contact, easy and comfortable application
